

## 슬라이드 자바스크립트 작성

```
var slides = document.querySelectorAll("#slides > img");
var prev = document.getElementById("prev");
var next = document.getElementById("next");
var current = 0;
```

```
showSlides(current);
prev.onclick = prevSlide;
next.onclick = nextSlide;
```

```
function showSlides(n) {
  for (let i = 0; i < slides.length; i++) {
    slides[i].style.display = "none";
  }
  slides[n].style.display = "block";
}
```

```
function prevSlide() {
  if (current > 0) current -= 1;
  else
    current = slides.length - 1;
  showSlides(current);
}
```

```
function nextSlide() {
  if (current < slides.length - 1) current += 1;
  else
    current = 0;
  showSlides(current);
}
```
